

TikTok

Un swipe ho diu tot de tu

- Quan, quina velocitat, acceleracions, quin trajecte, quin vídeo...
- En pocs segons t'ha creat el perfil psicològic
- Objectiu: trobar el que t'enganxa.

What Goes into Surveillance Pricing?

What's the price of X?

What's the price of X for consumer C through channel Z at location L at time T?

Price is increasingly multi-dimensional:

- ▶ Price targeting tools can be used to make pricing recommendation changes at different frequencies — from minutes to monthly.
- ▶ Different people can get different prices. Companies can determine prices for different locations, stores, customers, up to and including individual transactions.
- ▶ Companies can pursue price complexity and scale with fewer resources.

Surveillance pricing

Avís de la Federal Trade Commission, USA

Abans: Una cosa un preu.

Ara: Una persona, una situació, un preu.

Exemple de la FTC: Un consumidor que és perfilat com a "nou pare" pot veure intencionadament termòmetres per a nadons de preu més elevat a la primera pàgina dels seus resultats de cerca.
